REVISION NOTICE

February 15, 2016 Rev1:

- The Warranty Information section has been updated.

Any previous printed versions of this bulletin should be discarded.

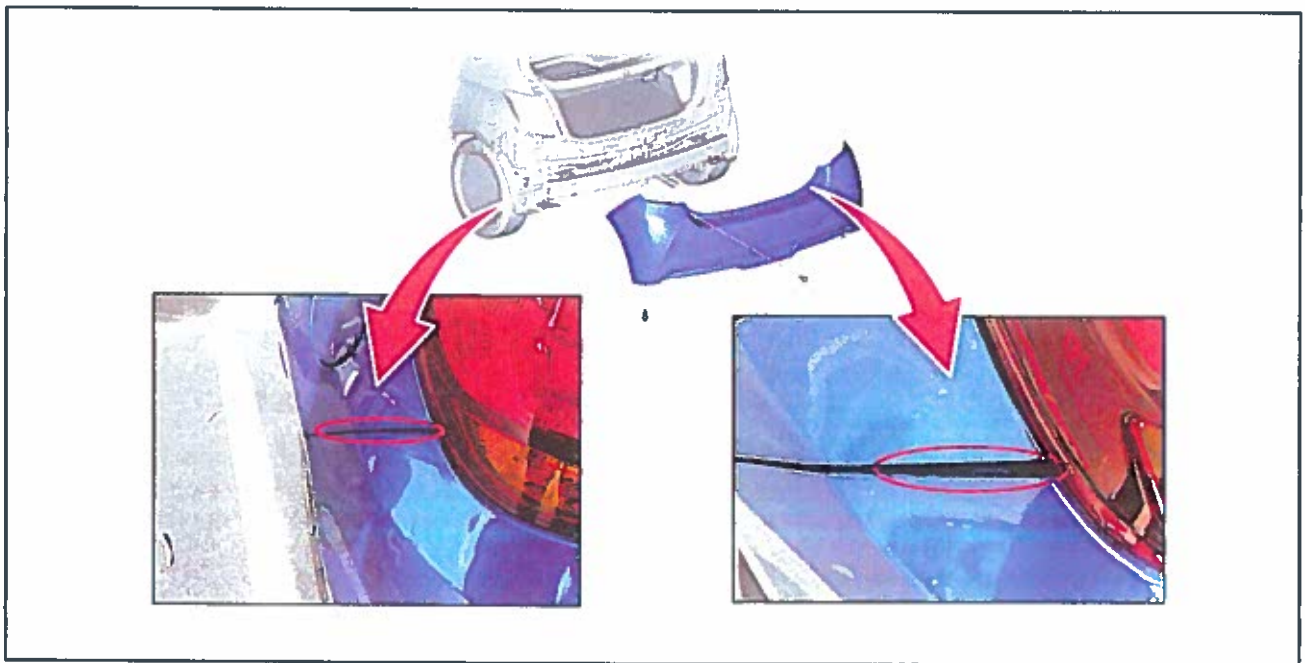

Introduction

Some 2014 – 2015 model year Yaris vehicles may exhibit a condition where there is an excessive gap between the rear bumper and the body due to a partial separation between the retainer and the bumper cover. Resecuring the rear bumper cover may not sufficiently prevent this gap from returning. The Rear Bumper Retainer has been revised to provide additional retention force to the rear bumper cover. Follow the Repair Procedure in this bulletin to address this concern.

NOTE

Some uniform gaps between the body and rear bumper cover is permissible and repairing uneven gaps as a result of collision damage is NOT a warrantable condition.
