## Service Bulletin

## PRELIMINARY INFORMATION

Subject: Fuel Gauge Will Not Read Below a 1/2 Tank

Models: 2015-2016 Chevrolet Colorado
2015-2016 GMC Canyon
The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

## Condition/Concern

The customer may state the fuel gauge does not go below $1 / 2$ tank and may report having run out of fuel. The technician may report after service the fuel gaug $\epsilon$ will not go over $1 / 2$ tank or will not go below $1 / 2$ tank.

## Recommendation/Instructions

Inspect the fuel level sender and verify it is in the correct slot of the fuel module. In the picture below, the left fuel module reflects the correct location where as the right fuel module reflects the incorrect position.

The picture below is a cut away of the right fuel module indicating the level sender contacting the side of the fuel tank.

| Labor Operation | Description | Labor Time |
| :---: | :---: | :---: |
| 4028590 | Fuel Tank Fuel Pump Module Fuel Level Sensor |  |
| Replacement | Use Published Labor Operation Time |  |

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
