## SAFETY RECALL

### 2011-2016 PCX125/150 ACCESSORY TRUNK BASE REPLACEMENT *(Interim bulletin until the complete bulletin is available.)*

Honda is launching a SAFETY RECALL on the Honda Genuine Accessory Rear Trunk Base for 2011-2016 PCX125/150 scooters for a potential defect that may allow the trunk to fall off the scooter while riding.

The portion of the rear trunk base that locks the trunk to the base is incorrectly dimensioned and may cause incomplete locking of the trunk to the base.

An updated rear trunk base will be available soon to correct this condition.

#### Safety Consequence

A rear trunk that inadvertently detaches while the scooter is under way poses a safety hazard to the scooter operator and other roadway users.

#### CUSTOMER NOTIFICATION

During the month of April 2016, Honda will mail a letter to all owners of PCX125 and PCX150 scooters informing them that their scooter may be affected by a safety related defect and advised to discontinue using the Honda Genuine Accessory rear trunk, or have a Honda dealer temporarily secure the rear trunk to the trunk base.

Once the updated rear trunk base is available, customers will receive a second notification advising them to have a Honda dealer replace the rear trunk base.
