

Reference	SSM72751
Models	Discovery Sport / L550
Title	L550 Discovery Sport Electrically Deployable Tow Hook failing to lock
Category	Accessories
Last modified	04-May-2016 00:00:00
Symptom	General Accessories

ContentIssue:-

The deployable tow hook fails to lock in either the stowed or deployed position. Running the recovery cycle fails to recover the system

Cause:-

The locking blocks can become jammed in the fully open position.

Action:-

CAUTION: This procedure requires SDD DVD_145.05.001 loaded or later.

- Connect the JLR approved battery support unit.
- Connect SDD to the vehicle and begin a new diagnostic session, by reading the vehicle identification number (VIN) for the current vehicle and initiating the data collect sequence.
- Follow the SDD prompts.
- If the hyperlink is not available, the application can be found as follows:
 - Select the Diagnosis Session Type.
 - Select the following symptom:
 - Body - External accessories - Deployable towbar - Inoperative
 - From 'Recommendations', run: Configure existing module - Deployable towbar control module
- Disconnect the JLR approved battery support unit.
- When all tasks are complete, exit the current session by selecting the Session tab and then selecting the Close Session option.
- Disconnect SDD.
- Run the recovery cycle to unlock the jammed locking blocks by operating the towbar using the hard switch at the back of the vehicle.

NOTE: several attempts (upto 10) may be required before the locking blocks unjam.
