

# Ferrari North America

## Technical Information

Date: December 2016  
Bulletin #: 2382  
Campaign #:  
Supersedes:  
Section: 10

**Model Type:** LaFerrari Aperta  
**Model Year:** All  
**Subject:** Specific tools

Please note that all dealers will be receiving the following mandatory specific tool from our Spare Parts Department.

**Tool P/N 333978** (Fig. 1) – Center-lock wheel nut wrench for removing and refitting specific wheel for **LaFerrari Aperta**.

Due to the higher tightening torque required for center-lock wheel nuts, in order to loosen these nuts correctly, a new specific wrench has been defined for this model, with a larger 1” bit mounting head. This wrench is identical to the tool included with the vehicle.

### Usage:

For removing and refitting wheels (see paragraph **D2.01** of the Workshop Manual from December 2016 update).

Thank you for your co-operation.
