Subject	Emissions Recall: 2012 Civic PZEV PCM Update
---------	--

Today, April 21, 2017, American Honda Motor, Co., Inc. is notifying all dealers of a voluntary emissions recall for certain model year 2012 Honda Civic PZEV vehicles to address the possibility of Non-Methane Organic Gas (NMOG) emissions above the regulation threshold.

Basic Problem

Due to an improper PCM calibration, under certain conditions after starting the engine the PCM cannot properly adjust the air-fuel ratio. As a result, the vehicle may be releasing air pollutants that exceed emissions standards.

The Repair

Update the PGM-FI software.

Campaign Information

Service bulletin 17-023, *Emissions Recall: 2012 Civic PZEV PCM Update* has been posted to the Service Information System today in support of this campaign. It includes software update, warranty and repair procedure information related to this emissions recall.

Parts Information

There are no parts associated with this update.

Warranty Information

Warranty information is available in service bulletin 17-023.

Tools Information

In support of the vehicle software update, software is available per the information in bulletin 17-023. Please follow instructions provided in installing software:

- HDS Software Version: 1.002.023 or later
- J2534 Software Information:
 - PC Application Version 1.1.0.2 or later
 - Database update 17-APR-2017 or later

As always, please make sure to check iN VIN Inquiry to determine if a particular vehicle is eligible for these or any other campaigns.
