

AM Reception Disrupted When Sharply Turning the Steering Wheel

AFFECTED VEHICLES

2014–16 MDX

We're currently looking at an issue concerning a disruption of AM reception when sharply turning the steering wheel. Some clients report that while driving slowly and listening to AM radio, they're hearing a whoosh or static sound from the speakers when sharply turning the steering wheel left or right.

If you happen to get any client complaints on this issue, let us know by completing a Field Quality Report or calling Tech Line.
