Bulletin #:	2428
Campaign #:	
Supersedes:	
Section:	10

Model Type: All
Model Year: All
Subject: Resetting of NQS (instrument panel node) ECU parameters

With reference to the above, we would like to draw your attention to the following points:

- Officially, as of today, Ferrari SpA will no longer supply the DEIS access codes for the NQS ECU reset cycle to Ferrari Technical Service Departments.
This procedure has already been informally implemented since March 2, 2017.
- By May 15, 2017, Ferrari SpA will release a software update for the DEIS tester that includes removing this cycle.
This update will cancel any item/paragraph regarding the above NQS ECU reset procedure from the tester.
- As a result of these two actions, the odometer “reset to zero” functionality is being removed from the DEIS tester.
- As of today, Technical Information no. **2428** is issued which cancels and replaces Technical Information no. **2290** of September 2015 which provided information on the NQS ECU reset procedure.
- Ferrari Academy will send to every service department a printed update of the technical documentation that was provided as a supplement to the technical DEIS and Electronic Diagnosis management courses held in Maranello and the Ferrari Academy branches worldwide.
This printed update cancels and replaces what has been provided to date in these departments.
- By May 15, 2017, the relevant paragraphs on the DEIS tool in the Ferrari Workshop Manuals (electronic format) will be updated.
This update includes the deletion of the NQS ECU reset procedures.

Thank you for your co-operation.
