SERVICE BULLETIN

Reference

February 1, 2017

Date:

# 2014 – 2016 ROGUE OCCUPANT CLASSIFICATION SYSTEM RETROFIT

NTB17-007a

This bulletin has been amended. The Parts Informatioin and Applied Vehicles have been corrected. No other changes have been made. Please discard previous versions of this bulletin.

**APPLIED VEHICLES:** 2014 – 2016 Rogue (T32)

USA built – first 3 digits of the VIN are 5N1... Korea built – first 3 digits of the VIN are KNM...

NOTE: Does not apply to Japan built Rogue (VIN starting with JN1...)

# SERVICE INFORMATION

The information in this bulletin is provided for customers who have concerns with their Occupant Classification System (OCS) operation after all campaigns have been completed.

Follow the steps in this bulletin to determine if this OCS retrofit procedure is applicable to the vehicle you are working on.

# **DETERMINE IF OCS RETROFIT APPLIES**

1. Check Service COMM to confirm if OCS reprogramming campaign has been completed (R1609 / NTB16-052).

#### Completed:

- Write on the repair order the date it was completed and by which dealer.
- Go to step 2.

# Not Completed:

- Complete campaign R1609 / NTB16-052.
- No further action needed. OCS retrofit does NOT apply.

Nissan Bulletins are intended for use by qualified technicians, not 'do-it-yourselfers'. Qualified technicians are properly trained individuals who have the equipment, tools, safety instruction, and know-how to do a job properly and safely. **NOTE:** If you believe that a described condition may apply to a particular vehicle, DO NOT assume that it does. See your Nissan dealer to determine if this applies to your vehicle.

- 2. Verify and document the customer's concern (have the customer demonstrate the concern).
- 3. Using CONSULT-III plus, check for Airbag or OCS related DTCs.

No Airbag or OCS DTCs: go to step 4.

# Airbag or OCS DTCs stored:

- Refer to the Electronic Service Manual (ESM), section SRC SRS Airbag Control System, for diagnostic and repair information.
- OCS retrofit does NOT apply.
- 4. If all of the following are confirmed:
  - Campaign R1609 / NTB16-052 has been completed.
  - Customer concern has been confirmed and documented.
  - No Airbag or OCS DTCs are stored.

# <u>Then</u>

5. Perform the Service Procedure in this bulletin.

# SERVICE PROCEDURE

**WARNING:** This procedure involves working under the passenger seat. The metal seat frame has sharp edges.

**CAUTION:** Handle interior trim carefully to avoid damage. Work with clean hands and clean tools to avoid dirt and stains. Use protective covers as needed.

**IMPORTANT:** Follow all cautions, warnings, and notes in the Electronic Service Manual (ESM) when working on or near a Supplemental Restraint System (SRS), such as an air bag or OCS components.

1. Turn the ignition ON, engine OFF.

Presets	1	2		3	4	5	6
AM							
FM 1							
FM 2							
SAT 1							
SAT 2							
SAT 3							
Bass	Treb	le	Bala	nce	Fade	Spd S	Sen. Vol.

2. Write down the radio settings.

- 3. Record (write down) any other customer settings that will be lost when the battery is disconnected.
  - Refer to the Electronic Service Manual (ESM) section PG-Power Supply, Ground, & Circuit Elements, for a listing of systems that may lose settings or memory when disconnecting the 12V battery.
    - Look in the PG section index for ADDITIONAL SERVICE WHEN REMOVING BATTERY NEGATIVE TERMINAL.
    - This list often includes items such as audio, HVAC, power windows, clock, etc.

- 4. Turn the ignition OFF.
- 5. Passenger seat removal:
  - a. Disconnect both battery cables, negative cable first.
  - b. Wait at least 3 minutes.
  - c. Remove the passenger seat from the vehicle.
    - Refer to the ESM, section SE-Seat, for seat removal information.
- 6. Set the seat in a clean working area.

- 7. Remove the seatbelt buckle.
  - Buckle is held on with one bolt.

Figure 1

- 8. Unclip and raise the seat side trim.
- 9. Disconnect the seatbelt buckle electrical connector.

Figure 2

10. From under the seat, remove the old OCS harness and install the new one.

• The OCS harness consists of the wiring and connectors between the OCS sensors, and OCS control unit.

#### **IMPORTANT:**

- a. Disconnect one OCS harness connector or mounting clip, then
- b. Connect the new OCS harness connector or mounting clip before moving to the next.
  - Disconnecting/connecting one at a time will ensure that the new harness is connected **exactly** as the old one.
  - Refer to images of the OCS harness on the next page.
  - Refer to images on pages 7 and 8 for exact harness mounting points.
  - **IMPORTANT**: There is one mounting clip that will need to be placed in a <u>different</u> location; it is shown in Figures 5 and 6 on page 8.

# EXAMPLE

# **Old** OCS harness and seatbelt buckle are removed from the seat.

# EXAMPLE

**New** OCS harness and seatbelt buckle to be installed

Notice the new harness and buckle have a new branch with connector

Figure 3

# **OCS Seat Harness Mounting Points**

Figure 4

# **OCS Seat Harness Mounting Points**

Figure 6

- 11. Replace the OCS control unit with the <u>new</u> one.
  - OCS control unit is held on with 2 screws.
  - The OCS control unit is located under the front edge of the seat.

Figure 7

12. Install the new seatbelt buckle.

- Torque the mounting bolt to: 49 N·m (5.0 kg-m, 36 ft-lb)
- 13. Attach the new branch connector from the buckle in the location shown.

Figure 8

14. Route and connect the new harness branch as shown.

Figure 9

15. Reattach the seat side trim.

16. Reinstall the seat into the vehicle in reverse order of removal.

• Torque passenger seat mounting bolts to: 40 N•m (4.1 kg-m, **30 ft-lb**)

17. Reconnect the battery cables, positive cable first.

18. Reset/reinitialize systems as needed.

- Refer to the ESM section, PG Power, Supply & Ground Elements for a listing of systems that require reset/initialization after reconnecting the 12V battery.
  - Look in the PG section index for ADDITIONAL SERVICE WHEN REMOVING BATTERY NEGATIVE TERMINAL.
  - > This list often includes items such as audio, power windows, clock, etc.

19. Perform Zero Point Reset, using CONSULT III plus, on the next page.

# Zero Point Reset

- 1. Prepare the vehicle for OCS zero point reset as follows:
  - Level the vehicle.
  - No objects on the passenger seat or in the storage bin.
  - No occupants in the vehicle including the servicing technician.
  - PC is outside of the vehicle on a suitable support.
    - > Do not set the PC on the vehicle.
  - Do not touch the vehicle during the OCS zero point reset.
  - Minimize vibrations of the vehicle.
- 2. Connect the plus VI to the vehicle.
- 3. Open / start CONSULT-III plus (C-III plus).
- 4. Turn the ignition ON, with engine OFF (engine not running/not in ready mode).
- 5. Wait for the plus VI to be recognized.
  - The Serial No. will display when the plus VI is recognized.
- 6. Select Diagnosis (One System).
- 7. Scroll C-III plus (All systems) and select OCCUPANT DETECTION.

- 11. Select Start and then proceed to step 12.
  - After selecting **Start**, if Figure 5A is displayed:
    - a. Check the OCS control unit and confirm that harness connector is completely seated.
    - b. Turn the ignition OFF and then restart procedure from step 4 on page 11.

Figure 7A	Step 13

- 14. Turn the ignition OFF and then back ON and observe the air bag warning light and front passenger airbag status light:
  - The air bag warning light

should illuminate for 7 seconds and then go out.

• The front passenger airbag status light should illuminate for 7 seconds and then either stay illuminated or go out depending on the occupation of the front passenger seat.

#### Front Passenger Airbag Status Light Operation

CONDITION	DESCRIPTION	PASSENGER AIR BAG INDICATOR LIGHT	FRONT PASSENGER AIR BAG STATUS	
Empty	Empty front passenger seat	ON (illuminated)	INHIBITED	
Nobody/Somebody	Bag or Child or Child Restraint or Small Adult in the front passenger seat	ON (illuminated)	INHIBITED	
Adult	Adult in front passenger seat	OFF (dark)	ACTIVATED	

**NOTE:** If the air bag warning light or the front passenger airbag status light does not operate as described above there may be an issue not covered by this bulletin. Refer to ASIST and the appropriate Service Manual for additional diagnostic and repair information.

15. Provide the customer with a printed copy of FRONT PASSENGER AIR BAG STATUS LIGHT OPERATION (see last page).

# PARTS INFORMATION

# Japan Built – First 3 digits of the VIN are JN1.....

This bulletin does not apply to Japan built Rogue

# **CLAIMS INFORMATION**

# Submit a Primary Part (PP) type claim using the following claims coding:

DESCRIPTION	PFP	OP CODE	SYM	DIA	FRT
Perform OCS Retrofit	(1)	RX5NAA	ZE	32	0.9

(1) Reference the Parts Information Table and use the applicable Occupant Sensor Controller Assembly part number as the Primary Failed Part (PFP).

# FRONT PASSENGER AIR BAG STATUS LIGHT OPERATION

**NOTE:** Please print this page and place a copy in the vehicle.

The front passenger seat is equipped with an occupant classification sensor (weight sensor) that turns the front passenger air bag on or off depending on the weight applied to the front passenger seat. The status of the front passenger air bag (ON or OFF) is indicated by the front passenger air bag status light which is located on the instrument panel. After the ignition switch is placed in the "ON" position, the front passenger air bag status for about 7 seconds and then turns off or remains illuminated depending on the front passenger seat occupied status. The light operates as follows:

CONDITION	CONDITION DESCRIPTION		FRONT PASSENGER AIR BAG STATUS
Empty	Empty front passenger seat	ON (illuminated)	INHIBITED
Nobody/Somebody	Bag or Child or Child Restraint or Small Adult in the front passenger seat	ON (illuminated)	INHIBITED
Adult	Adult in front passenger seat	OFF (dark)	ACTIVATED
