TECHNICAL SERVICE BULLETIN

SUBJECT: FRONT DOOR LATCH - CUSTOMER SATISFACTION PROGRAM (CS1603)

* NOTICE

This bulletin has been revised to include additional information. New/revised sections of this bulletin are indicated by a black bar in the margin area.

This bulletin provides information regarding the inspection, upgrade and/or replacement of door latches on 2011MY Sorento (XMa) vehicles. Kia has determined that after extended usage over years, the door latches may not function properly when being activated with the outside handle and the door may not open.

- For Front Door Latches: Vehicles may have previously had one or both front door latches replaced with improved ones. Therefore, each vehicle must be confirmed in WebDCS whether it is eligible to have either driver's or front passenger's or both front door latches inspected, upgraded and/or replaced. If the eligible driver and/or front passenger door latches are properly functioning, begin by inspecting the door latch. If the door latch does NOT have the blue locking lever as described on page 9 of this bulletin, upgrade the driver and/or front passenger door latches by installing a spacer clip to the latches. If the eligible driver and/or front passenger door latches are not properly functioning, replace the driver and/or front passenger door latches with new ones.
- For Rear Door Latches: Kia is extending the warranty on rear door latches from 5 years/60,000 miles to 10 years/unlimited mileage, starting from the date of first service. If, within the extended warranty period, either rear door latch does not function properly when being activated with the outside handle and the door does not open, replace the affected door latch with a new one.

* NOTICE

To assure complete customer satisfaction, always remember to refer to WebDCS Warranty Coverage (validation) Inquiry Screen (Service \rightarrow Warranty Coverage \rightarrow Warranty Coverage Inquiry) for a list of any additional campaigns that may need to be performed on the vehicle before returning it to the customer.

File Under: <Voluntary Service Campaign>

Circulate To: ☐ General Manager ☐ Service Manager ☐ Parts Manager

☑ Service Advisors ☑ Technicians ☑ Body Shop Manager ☑ Fleet Repair

Inspection Procedure:

- 1. Check the function of both front door latches by opening the doors using outside and inside door handles.
 - If the door(s) open(s) properly, perform the door latch lever inspection by referring to the inspection procedure below.
 - If the door(s) malfunction, replace the door latch(es) with an improved part using the procedure on page 12.

Front Door Latch Inspection Procedure (if the latch is working properly):

1. Remove the quandrant inner cover and disconnect the tweeter speaker (A).

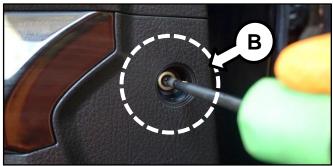

Use a non-marring trim removal tool (such as Snap-on® Part Number PBN5 or equivalent) to avoid damaging trim pieces.

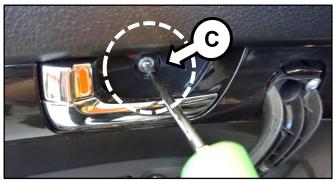

2. Remove the inner screw trim cap below the quadrant cover and remove the retaining screw (B).

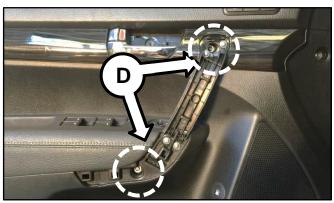

3. Remove the interior door handle inner trim cover and remove the retaining screw (C).

4. Remove the grip cover by gently prying on the lower portion of the cover. Remove the two (2) retaining screws (D).

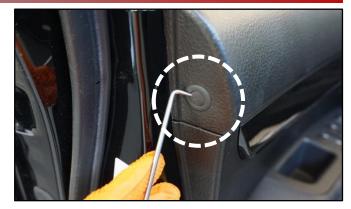

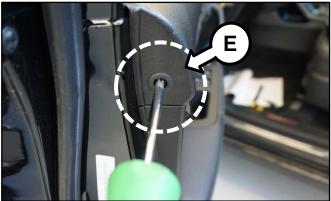

FRONT DOOR LATCH (CS1603)

5. Remove the screw cap at the rear of the door trim and remove the retaining screw (E).

Use caution to avoid damaging interior trim pieces.

6. Remove the arm rest screw cap and remove the retaining screw (F).

7. Remove the door panel. Leave the 2 master switch harnesses connected to allow for glass retaining bolt alignment in step 9.

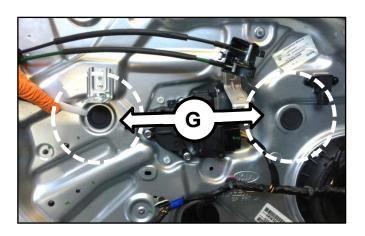

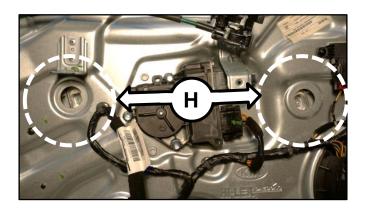

8. Remove the glass retaining bolt covers (G).

* NOTICE

Harness removed from the door module for demonstration only purposes.

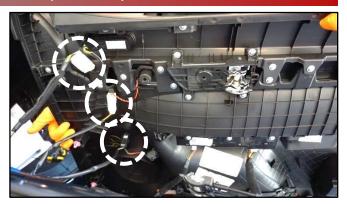

9. Lower the glass until the two (2) retaining bolts (H) are visible.

FRONT DOOR LATCH (C\$1603)

10. Disconnect the front door harnesses and remove the door panel.

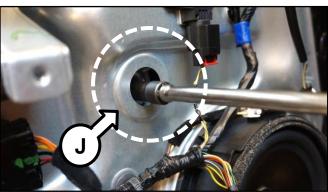

11. Remove the two (2) retaining bolts (J) and carefully raise the glass and secure with suitable clamp or other glass securing device.

Tightening torque : 5.8~8.7 ft-lb (7.8~11.8 N.m)

When securing glass, use caution not to scratch or break the glass.

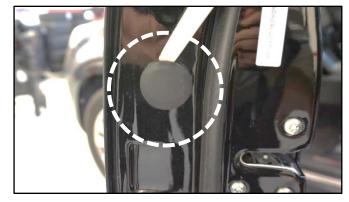

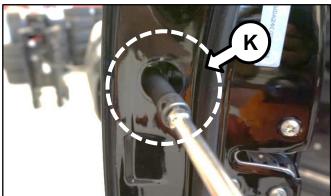

12. Remove the handle trim cap bolt cover and loosen the outside door handle trim cap bolt (K).

Tightening torque: 5.8~8.7 ft-lb

(7.8~11.8 N.m)

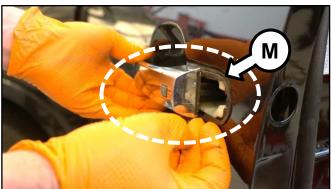

13. Remove the door handle trim cap (L) and tumbler. Remove the door handle (M) by pulling out on the handle slightly and sliding the handle towards the rear of the car.

* NOTICE

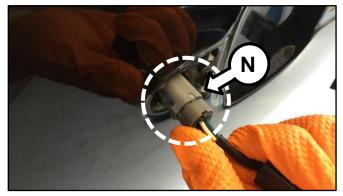

Use caution not to damage the door handle gasket upon removal of the door handle.

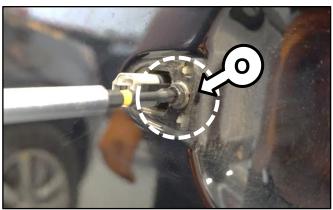

FRONT DOOR LATCH (CS1603)

14. Disconnect the handle harness (N). and loosen the door handle base screw (O).

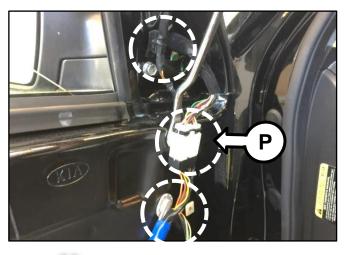

15. Disconnect connector (P) and detach the three (3) wire harness retaining clips from door frame.

* NOTICE

Use care to not damage the harness retaining clips when removing the harness.

16. Remove the eight (8) bolts securing the door module.

Tightening torque: 5.1~8.0 ft-lb

(6.9~10.8 N.m)

FRONT DOOR LATCH (CS1603)

17. Remove the three (3) screws securing the door latch.

Tightening torque : 5.1~8.0 ft-lb (6.9~10.8 N.m)

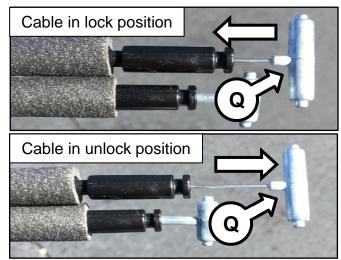

18. Remove the door module from the door without disconnecting the harness.

* NOTICE

Support the module to prevent damage to the harness.

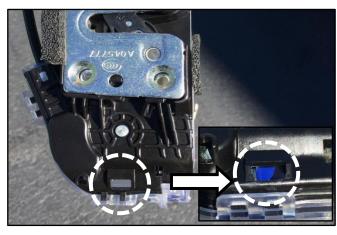

19. Put the lock cable (Q) in the lock position.

20. With a flashlight, inspect the internal lever color by looking inside the square as shown.

If the color is <u>not</u> blue, proceed to the **Front Door Latch Repair Procedure** on page 10.

If the color <u>is</u> blue, no further action is required. Reinstall all removed components in the reverse order of removal. Repeat the initial inspection procedure for the other front door.

Front Door Latch Repair Procedure (if internal lever color is not blue):

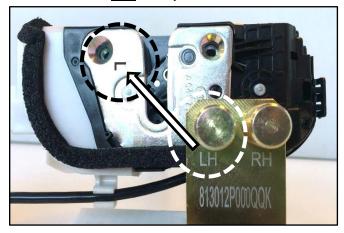

1. With the front door latch still attached to the door module, attach the jig to the latch using the bolt associated with the side being serviced and tighten. Snug the corresponding bolt to the plastic housing to allow for even pressure.

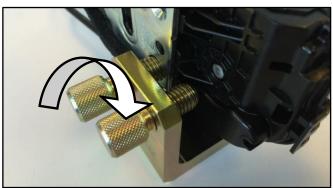

* NOTICE

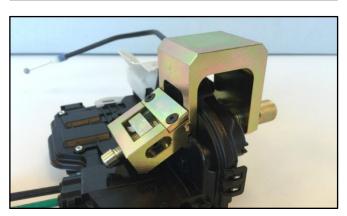

Left hand (LH) latch shown and is removed from the vehicle for demonstration only purposes.

* NOTICE

Tighten bolts by hand <u>ONLY</u>. Do NOT use hand or power tools.

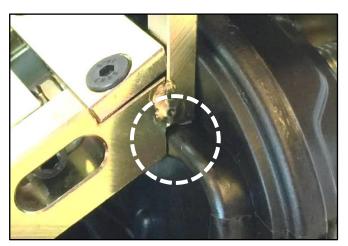

* NOTICE

Make sure the jig is seated flush in the location shown.

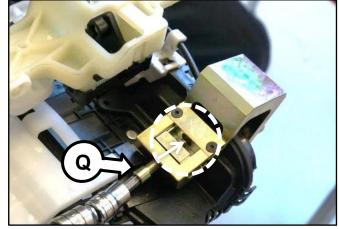

FRONT DOOR LATCH (CS1603)

2. Turn the jig cutting bolt (Q) clockwise until the cutter is fully extended to cut a thin slot into the latch cover.

* NOTICE

Tighten cutter bolt by hand <u>ONLY</u>. Do <u>NOT</u> use power tools.

* NOTICE

If the slot is not completely cut, carefully expand the slot with a razor as shown.

Use caution when using a razor to avoid personal injury.

3. Apply a small amount of super glue at the surface shown.

4. Insert the clip with the flat side into the slot as shown.

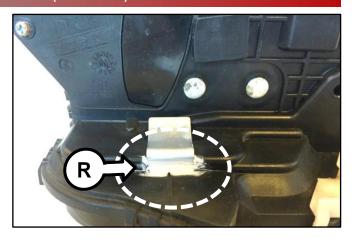

* NOTICE

The curved side of the clip will rest in the adhesive.

FRONT DOOR LATCH (CS1603)

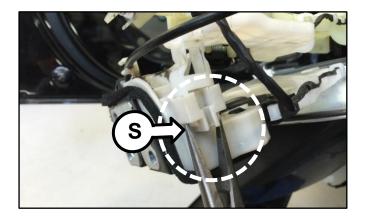

5. Apply silicone RTV sealant around the clip slot (R).

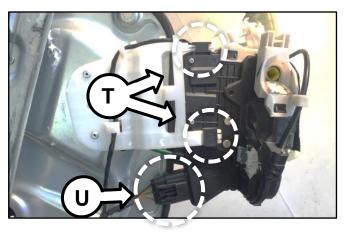

6. Reassemble in the reverse order of removal. Confirm proper operation.

Front Door Latch Replacement Procedure (if latch is not working properly):

- 1. Follow steps 1 through 18 in Front Door Latch Repair Procedure above.
- 2. Disconnect the handle base (S) from the latch as shown.

3. Disconnect the two (2) tabs (T) securing the latch to the door module and the electrical connector (U).

FRONT DOOR LATCH (CS1603)

4. Disassemble the cables from the cable cage. Remove the latch assembly and replace.

5. Reassemble in the reverse order of removal. Confirm proper operation.

REQUIRED TOOLS:

Part Name	Part No.	Qty.	Figure	Comments
Latch Repair Kit	81300 2P000QQK	1	-	Auto-shipped to Dealer For replacement, contact Snap-On Business Solutions at (888) 542-1011
Jig (Included in kit)	81301 2P000QQK	0		For replacement, contact Snap-On Business
Backup Knife (Included in kit)	81302 2P000QQK	0		Solutions at (888) 542-1011

REQUIRED PARTS:

Part Name	Part No.	Qty.	Figure	Comments
Front Door Latch (LH)	81310 2P000QQK	1		-
Front Door Latch (RH)	81320 2P020QQK	1		-
Clip (40 included in Latch Repair Kit)	81303 2P000QQK	2		Additional clips available through normal parts ordering process
Super Glue	N/A	1	SUPER CLIFE SUPER	Gorilla Glue or Super Glue Sourced locally
Silicone (RTV)	UM010 CH046	1	GRAY STORY STO	Order through Kia Chemicals
