	NUMBER <b>162 (Rev 1, 04/07/2017)</b>	DATE <b>March 2017</b>
<b>TECHNICAL SERVICE BULLETIN</b>		
SUBJECT: <b>BACKUP WARNING SYSTEM MALFUNCTION</b>		

**\* NOTICE**

**This bulletin has been revised to include additional information. New/revised sections of this bulletin are indicated by a black bar in the margin area.**

This bulletin provides the procedure to replace ALL four (4) backup warning sensors on some 2014MY Sorento (XMa) vehicles, produced from January 8, 2013 through November 1, 2013, which may experience an inoperative and/or malfunctioning sensor(s). Follow the procedure outlined in this bulletin to replace ALL four (4) sensors in the rear bumper to resolve the concern.

To enhance customer satisfaction, this bulletin outlines the replacement of ALL four (4) backup warning sensors, even when only one sensor is affected.

Backup Warning Sensors

File Under: <Body>

- 
- Circulate To:     General Manager     Service Manager     Parts Manager  
 Service Advisors     Technicians     Body Shop Manager     Fleet Repair

**Service Procedure:**

1. Place the vehicle on a lift and lower the spare tire, as shown.

**\* NOTICE**

Complete removal of the spare tire is not necessary.

2. Locate the four (4) backup warning sensors on the rear bumper fascia.

3. Reach through the gap between the rear fascia and the spare tire and remove all four (4) backup warning sensors, as shown.

With one finger, push on the sensor head from the exterior and into the bumper, and with the other hand, spread the inner sensor retainer outward to remove the sensor from the rear of the bumper. Disconnect the electrical connectors.

4. Install the replacement sensors by reversing the order of removal.
5. Verify proper operation of the four (4) backup warning sensors.
