# Service Bulletin No. 3100

<small>MODEL</small> <b>D / J4500</b>	<small>TYPE</small> <b>Service Information</b>	<small>SECTION/GROUP</small> <b>8-Engine</b>	<small>DATE</small> <b>Feb. 10, 2017</b>
<small>SUBJECT</small> <b>API OIL CLASSIFICATION CK-4</b>			
<small>CONDITIONS</small> <b>Service Information Only.</b>			

## **Description:**

MCI is informing our customers of the update to the API oil classification.

Inline with the 2017 updates to the API oil classification, CK-4 10W30 oil will replace both the CJ-4 5W40 and 15W40 predecessors. API CK-4 is fully backwards compatible and interchangeable with the previous CJ-4 classification.

CK-4 can be used as the normal fill and top-off on existing engines that were factory filled with CJ-4.

In addition, MCI has standardized on 10W30 grade oil as factory fill for all diesel applications since the start of 2016, replacing the previous 5W40 winter and 15W40 summer oil specifications.

***Engines must only use CJ-4 or CK-4 engine oil. Failure to use CJ-4 or CK-4 engine oil will reduce component life.***
