16" hose length for MTIS by P.S.I. kits installed on 22.5" 10-hole aluminum wheels used on trailer axles #641

Date: 3/17/2017

Subject: 16" hose length for MTIS by P.S.I. kits installed on 22.5" 10-hole aluminum wheels used on trailer axles.

Models: All MTIS by PSI part numbers

Product Information Letter

3/17/2017

Meritor is pleased to announce the availability of a new tire hose length as an option to all MTIS by P.S.I. kit part numbers. This is in response to the growing interest of fleets in 22.5" 10-hole aluminum wheels for dual tire applications on trailers.

The hole size and spacing in the 22.5"10-hole aluminum wheel reduced the distance between the inside dual tire valve stem and the rotary union causing the standard hose to come into contact with the wheel as shown in pictures above.

The new optional length ensures proper fit up of the inside dual hose to the rotary union or thru tee to help prevent contact between the hose and the wheel.

Hose not touching the wheel
