

A/C and Furnace turned off

Press the On/Off/Mode button once, it will go to Fan. You will see Au for Auxilliary mode. Fan will still not work at this stage.

To operate the Fan in Au setting, you need to press the "+" or "-" sign to adjust the setting to Low or Hi.

This is in "Hi" setting. If you want to Turn Off the Fan, press the "+" or "-" to set to "Au" and the Fan will stop automatically.
