## SUBJECT: 2017 CX-5 AND CX-9 – INCORRECT CONTROLLER PROGRAMMING INSTRUCTIONS WITH ACCESSORY REMOTE START KIT C960-V7-620

There is a minor error with the Controller Programming instructions included with the accessory remote start kit C960-V7-620. In the current “Registration (programming) of the controller” instructions, step 5 shows an incorrect image. The function button is the lower button. A revised set of instructions are available in the Accessory E catalog and will be included in all kits at the next revision point.

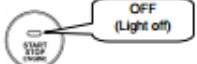

**GENUINE REMOTE ENGINE START**  
**[Part No. C960 V7 620]**  
**Registration Procedure Of the Controller**

After installation of Remote Engine Start (RES), register the controller of RES to the vehicle according to the following procedure.

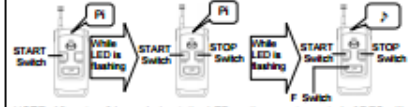

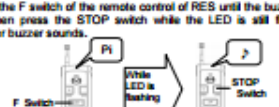

NOTE: If this registration procedure is not performed, the vehicle engine cannot be started with the remote control.

**[Preparation]**

- 1) Prepare the remote control of RES.
- 2) Prepare two advanced keys registered to the vehicle in advance.
- 3) Insure headlights, fog lights and wipers are set to OFF (Not auto).  
Close all doors, hood and trunk/hatch.
- 4) 30 seconds or more have passed after connecting the vehicles battery.  
NOTE: This registration cannot be performed until 30 seconds have passed after connecting the vehicles battery.
- 5) Set the ignition status to the "OFF".

 Remote control of RES  
 Advanced key-1  
 Advanced key-2  
 OFF (Light off)

**[Registration procedure]**

Procedure	Operation key	Operations	Response when it succeeds in operation	Response when it fails in operation
<b>Start registration</b>				
1	Remote control of RES	(1) Hold down the START switch on the remote control of RES. (2) After the buzzer sounds, and while still keeping the START switch pressed, press the STOP switch while the LED is still flashing. (3) After the buzzer sounds, and while still keeping the two switches pressed, press the F switch while the LED is still flashing until another buzzer sounds.  	■ Controller of RES   Buzzer sounds twice with long beep	■ Controller of RES   Buzzer doesn't sound
2	Advanced Key-1	Hold up the Advanced key-1 to Push Button Start switch, and set the ignition status from "OFF" to "ON" by pressing the Push Button Start switch.   NOTE: Do not step on the brake pedal while operating the Push Button Start switch.	■ Security indicator   Turns on for 3 seconds	■ Security indicator   Flashes
	3	After the security indicator in Meter panel turns off, release the hold-up key from the Push Button Start switch. And then, set the ignition status from "ON" to "OFF" by pressing the Push Button Start switch.	■ Security indicator   Flashes	■ Controller of RES Refer to tab.1  Buzzer sounds
4	Advanced Key-2	Do the same operations as Procedure 2, 3 with the Advanced key-2.	Refer to Procedure 2, 3	
5	Remote control of RES	Press the F switch of the remote control of RES until the buzzer sounds, and then press the STOP switch while the LED is still flashing until another buzzer sounds.  	■ Ignition status ON (Light on) Ignition status is automatically set to "ON"	■ Ignition status OFF (Light off) Ignition status keeps "OFF"
<b>Complete registration</b>
