GMC	Yukon Models	2017	All	All	5.3L L83 6.2L L86	All
Involved Region or Country		North America				
Additional Options (RPO)		N/A				
Condition		Auto Stop message on the DIC				
Cause		We have seen this message on 2017 pickups just before they stall due to various reasons				

Correction:

Note about the Auto Stop message on the DIC.
It appears that anytime the engine comes to a stall or near stall, the "Auto Stop" message on the DIC will light momentarily (just a second and may blink on several times then go out).
At this time it is unknown why this anomaly occurs.
It appears this gauge cluster can be used with an auto stop vehicle even though trucks do not have auto stop at this time.
It may be for future use on other trucks.

Bottom line is to ignore this message and repair the issue of stalling or near stall concern.
