PRODUCT UPDATE

ABS Sensor Bracket

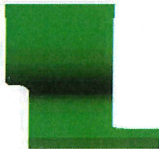

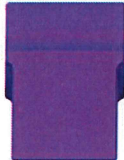

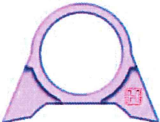

LIT NO: P16007
DATE: July 2017

REV: A

Hendrickson Trailer Commercial Vehicle Systems announces a change to ABS sensor brackets for 5-inch diameter axles and a revised design for LDA™ axles on VANTRAAX®, ULTRAA-K®, INTRAAX®-SP, INTRAAX®, CONNEX™, CONNEX™-ST suspension systems and TRLAXLE® non-integrated axles.

Beginning with shipments in July 2017, 5-inch diameter axles will feature a powdered metal ABS bracket. The powdered metal design offers a more stable solution to help protect ABS sensors. Fit and function of the new bracket remain unchanged from the previous design and suspension/axle model numbers are unaffected by this change.

ABS brackets for LDA™ Large-Diameter Axles (5.75-inch) were converted to a powdered metal design in 2016 but have been redesigned to a more optimized structure. Fit and function remain unchanged and suspension/axle model numbers are unaffected by this change.
