

## False *Low Oil Pressure* HondaLink® Message

### AFFECTED VEHICLES

2017 Clarity Electric

Are you seeing a **Low Oil Pressure** HondaLink message? It's obviously false, and it's all because of an incorrect warning list in the Display Audio.

Fortunately, it's an easy fix. Just do a factory data reset.

1. From the **HOME** screen, select **Settings**, then **System**.
2. Select the **Others** tab, then **Factory Data Reset**. You'll see a confirmation message.
3. Select **Yes**, then select **Yes** again. You'll see another confirmation message.
4. Select **OK**. The system will now reboot. **During this time, do not turn off the ignition!**

Once the reset is finished, return the vehicle to your customer. When he or she connects the phone to the Display Audio using *Bluetooth*® or WiFi, and selects **HondaLink**, the correct warning list will immediately download.
