Subject: Brake Chamber Mounting Position. 788999

Hi Eric,

We need your assistance,
Serial number 788999, It does appear that the brake chambers may have been mounted in the incorrect position.

The below diagram show where the chambers should be mounted for the slack adjuster length.
Your chambers should be mounted in holes B-A or A-B

Can you please check your units to see if they are installed properly.
If they are not, Please let me know and we can make arrangements to get them fixed properly.

You can have your shop guys make these changes and submit a bill for the work.
Or we can make arrangements to get them to a shop to get fixed.

Any questions please feel free to let me know.

Brake Chamber Mounting

Install the air chamber in the mounting holes in the chamber bracket according to the slack adjuster length required. (Figure 2.4)

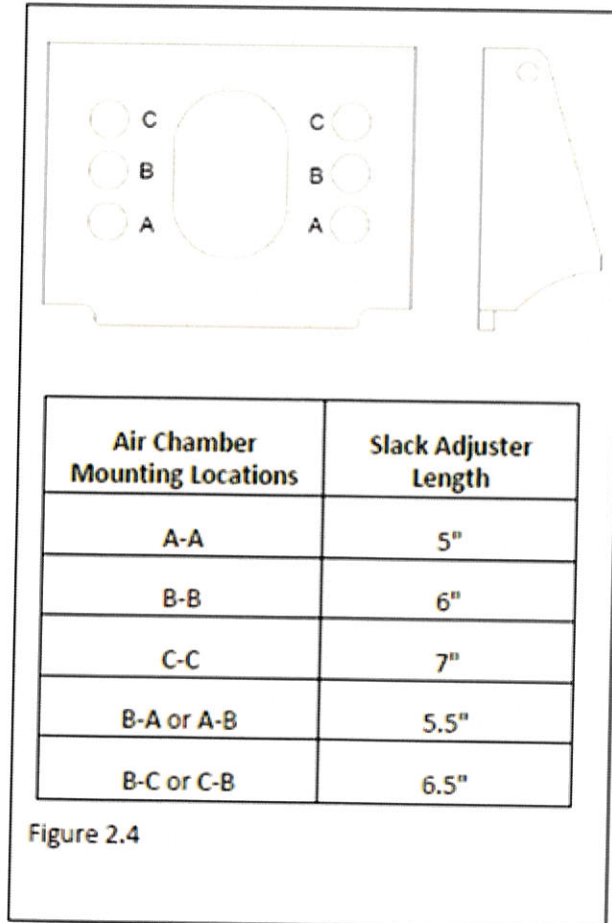

Figure 2.4

Thanks,
Joe Kleckner

A handwritten signature in black ink, appearing to read 'Joe Kleckner'.
