Title	Head Up Display (HUD) does not display the cruise control value below 20 Mph / Kph
Category	Electrical
Last modified	11-May-2017 00:00:00
Symptom	204000 Instrumentation

Content Only affects 17MY Vehicles. Issue is resolved at 18MY

Issue

A customer may express a concern that the cruise control value is not displayed on Head Up Display below 20Mph or 20Kph even though the instrument cluster displays the cruise control value down to 10Mph or 10Kph.

Cause

Software error @17MY introduction.

Action

Should a customer express this concern, follow the Diagnostic Procedure below: Configure Head Up Display Control Module (HUDCM)

1. CAUTION: This procedure requires SDD file 148.06.001 loaded or a later version. Connect the Jaguar Land Rover approved battery support unit.
2. Connect the Jaguar Land Rover approved diagnostic tool to the vehicle.
3. Begin a new diagnostic session by reading the Vehicle Identification Number (VIN) for the current vehicle and initiating the data collect sequence.
4. Follow the Jaguar Land Rover approved diagnostic tool prompts.
5. If the hyperlink is not available, the application can be found as follows: Select the Diagnosis Session Type.

Select any of the following symptoms:

Electrical > Instruments > Information and message centre > Information graphic display > Graphic display incorrect From

'Recommendations', run: Configure existing module - Head up display

6. When all of the tasks are complete, exit the current session by selecting the 'Session' tab and then select the 'Close Session' option.
7. Disconnect the Jaguar Land Rover approved diagnostic tool and the Jaguar Land Rover approved battery support unit.

Technicians - Please rate this SSM and provide comments so that future communications can be improved.
