

Service Bulletin

TECHNICAL

Subject: Left Tail Lamp Flashing Too Fast and/or Left Turn Malfunction Message in the DIC

Brand:	Model:	Model Year:		VIN:		Engine:	Transmission:
		from	to	from	to		
Cadillac	ATS	2017	2017			All	All

Involved Region or Country	North America
Additional Options (RPO)	Excluding RPO - TVN (LAMP-TAIL & STOP, ECE)
Condition	Some customers may comment that the left tail lamp is flashing too fast and/or they may receive a left turn malfunction message in the DIC.

Correction

Caution: DO NOT swap the right and left tail lamps during root cause diagnosis. Connector grounds are different for the two lamps and the right side lamp circuit board could be damaged if the lamp is plugged into the left side electrical connector.

For vehicles displaying the above condition, replace the left tail lamp assembly.

- **For coupes:** refer to *Rear Body Structure Stop Lamp Replacement (Coupe)* in SI.
- **For sedans:** refer to *Tail Lamp Replacement (Sedan)* in SI.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
