

Service Bulletin

TECHNICAL

Subject: Service Park Assist Message Displayed on Driver Information Center (DIC) and/or DTCs B094D-01, 02, 04, B094E-01, 02 and 04 Set

Brand:	Model:	Model Year:		VIN:		Engine:	Transmission:
		from	to	from	to		
Chevrolet	Malibu	2016	2016				

Involved Region or Country	North America and N.A. Export Regions
Additional Options (RPO)	Equipped with Semi-Automatic Parking Assist (RPO UFQ)
Condition	Some customers may comment on the Service Park Assist message being displayed on the driver information center (DIC). Upon investigation, the technician may find DTCs B094D-01, 02, 04, B094E-01, 02 and 04 set.
Cause	This condition may be due to a software anomaly.
Correction	An updated software calibration has been released to address this condition. Important: Verify the battery voltage is more than 12.6 volts but less than 15.5 volts before proceeding with reprogramming. The battery must be fully charged BEFORE reprogramming. Important: During reprogramming, the battery voltage must be maintained within the proper range of 12.6-15.5 volts. CONNECT the approved Midtronics® PSC 550 Battery Maintainer (SPS Programming Support Tool (EL-49642) to the vehicle or the GR8 (EL50313) in the power supply mode.

Modified	

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
