Motor Vehicle Recall Notification - Recall Campaign No. 15V 803

Dear Valued Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Newmar Corporation has decided that a defect which relates to motor vehicle safety exists in specific motor homes.

On certain motorhomes, the cargo door lock actuator on the baggage doors could overheat due to a faulty keyless entry module configuration. If operated with a battery voltage below 9.5 VDC, the actuator could chatter, overheat and melt along with a portion of the inner door material which would increase the risk of fire causing injury and/or damage to property. Correction: Dealers will install a new low voltage disconnect module and wire harness.

These motor homes require immediate service. Continued use poses a potential safety hazard.

The Safety Risk

This has the potential of starting a fire. If the actuator chatter lasted for a long enough duration, the actuators could overheat and melt the actuator housing along with a portion of the adjacent inner door material.

WHAT WE WILL DO

Newmar Corporation will provide owners of all affected motor homes a remedy for the potential defect at no charge for parts or labor. This remedy consists of installing a new low voltage disconnect module and wire harness. The repair is expected to take .5 hour to complete.
