

# Flood Damage

SERVICE BULLETIN #484

9/18/2017

**TO:** Regional Operations and Sales Managers, Dealer Principals, Parts and Service Managers

**FROM:** James M. Brown, Manager, Customer Service

**SUBJECT: Flood Damage**

Many areas have experienced severe flood conditions recently due to Hurricanes Harvey and Irma. As a result of these conditions, trailer and truck body components may have been submerged in contaminated flood waters, causing the potential for damage and safety hazards. To help minimize the risks associated with potentially-damaged components, Great Dane is distributing technical bulletins provided by the following component suppliers with their recommendations on inspection and service after exposure to flood waters.

Please share this information with your customers as necessary.

**[MERITOR TP 1305](#):** Service Instructions for Heavy Vehicle Components that are Submerged in Contaminated Floodwater.

**[MERITOR WABCO TP-0586](#):** Service Instructions for Meritor WABCO Components that are Submerged in Contaminated Floodwater as a Result of the Recent Hurricanes.

**[STEMCO TECH TIP #30](#):** Inspection, Rebuild, Reassembly of Submerged Tractor and Trailer Wheel Ends.

**[HENDRICKSON L578](#):** Preventative Maintenance Guide Flood Service Requirements
