Subject

Pirelli Tires designed for Huracan 2WD and Aventador S

Model/VIN Range

All Aventador and Huracán .

Information for the field

Automobili Lamborghini S.p.A. wishes to provide further information on the installation of Pirelli tires on its vehicles.

wishes to clarify beyond all possibility of doubt that

1. summer tires developed for the two-wheel drive versions of Huracán can **NOT** be fitted on the four-wheel drive versions;
2. tires developed for Aventador S and Centenary can **NOT** be fitted on previous generation Aventador.

Such situations are determined by the different rolling circumference of the cars and by the quest to improve the performance of Lamborghini cars.

To avoid possible installation errors, we have prepared a diagram (in attachment) which we recommend that you place next to your tire assembly station.

Finally, it should be remembered that Pirelli tyres specially designed for Lamborghini cars are **ALWAYS** marked with the letter "L" signed on the shoulder, as in Figure 1.

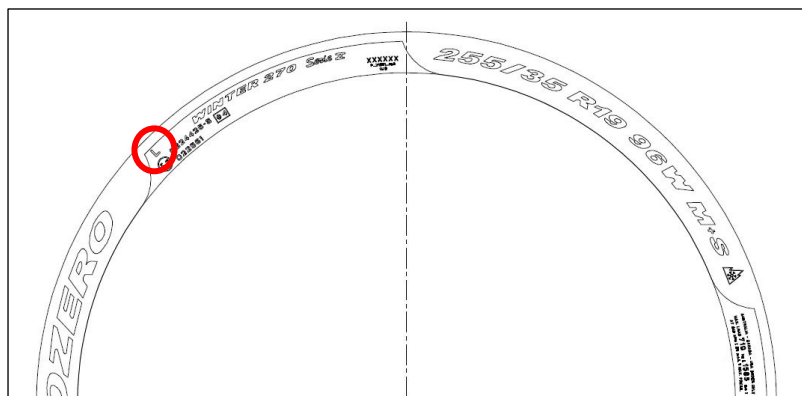

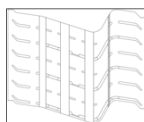

Figure 1 - Identifying a tire designed especially for Lamborghini

For further information, don't hesitate to contact the Service Area Manager.

Best regards,

Customer Service.

AVENTADOR - PIRELLI TYRES MOUNTING

P ZERO™
