Binder – 5 – Body

## Imperfections Caused by Manual Application of Seam Sealer on Production Line

Vehicle Type: **Panamera (971)**

Model Year: **2017**

Information: Seam sealer on the production line was manually applied in the early vehicles.

Symptom: As a result of seam sealer being applied manually, an imperfection could allow water to leak into the passenger compartment.

For example, the plenum area might not have been sealed perfectly, allowing water into the passenger compartment.

Information for workshop:

Vehicles built on or after January 21, 2017 have the seam sealer applied using the normal automated process.

A commercially available seam sealer such as 3M MSP 8374 may be used.
