DESCRIPTION

Some vehicles may exhibit one of the following concerns:

- Sometimes the shifter may jump out of 3rd gear over a road bump when accelerating after deceleration at 25-40 mph (40-65 km/h)
- Hard to shift into 3rd, 4th, 5th, and/or 6th gear
- Shift lever vibrates when driving in 3rd or 4th gear

This is caused by inappropriate transmission internal parts.
