

Instrument Cluster Reprogramming (MID
140)
VN

**FSB 381-018, Instrument Cluster, Reprogramming
(MID 140)**

(June 2017)

On certain Volvo models built between January 15, 2017 and May 14, 2017, with "Learning By GPS Positioning" (Sales code N1DA1X); the cluster may not display the cruise set speed. This is due to a software error in the instrument cluster. To correct this issue, follow the reprogramming steps outlined in this Field Service Bulletin.

Repair, Reprogramming Procedure

You must read and understand the precautions and guidelines in Service Information, group 30, "General Safety Practices, Electrical" before performing this procedure. If you are not properly trained and certified in this procedure, ask your supervisor for training before you perform it.

NOTE: Information is subject to change without notice. Illustrations are used for reference only and can differ slightly from the actual vehicle being serviced. However, key components addressed in this information are represented as accurately as possible.

- 1 Park the vehicle on a flat and level surface.
- 2 Apply the parking brake.
- 3 Place the transmission in neutral or park.
- 4 Install the wheel chocks.

W7086748

- 5 Connect the vehicle to Premium Tech Tool.
- 6 Reprogram the Instrument Cluster (MID140).

Note: Follow the on screen prompts until the programming is complete.

7 Remove the wheel chocks.
