

# Warranty Communication

---

**Audi Warranty – Technical Support – Service Operations**

**Number: AWC-17-09**

**Subject: Test Missing for Model Year 2017 A6 –  
Engine Code CREH**

**Date: Feb 14, 2017**

**Dealers: U.S., Puerto Rico**

This document conveys general  
Warranty information.

---

During validation on the current Audi brand version 2.11.1, it was noticed that the Guided Fault Finding (GFF) function test, the Electrical Components feature, and the Sub-Systems Basic Conditions feature are missing for the model year 2017 A6 with engine code CREH.

This concern has been corrected and will be available on the next Audi Brand Diagnostic Content ODIS version update, which will be released soon. Until this update is released, select one of the following engine codes at the start of the ODIS diagnostic session:

- ▶ CREC
- ▶ CTDA
- ▶ CTDB

If you experience any issues or concerns while running this function test, please submit an ODIS feedback with the appropriate log, screen shot and a detailed description of the concern.

Thank you.
