Ventana LE	<input type="checkbox"/>	London Aire	<input checked="" type="checkbox"/>	Other	<input type="checkbox"/>

DESCRIPTION

SilverLeaf has determined that, in some cases, the TM102 Coach Management module (between version 3.38 and 3.42) may not communicate with the engine computer using the 500k baud rate. In response, Newmar has issued TSB 491.

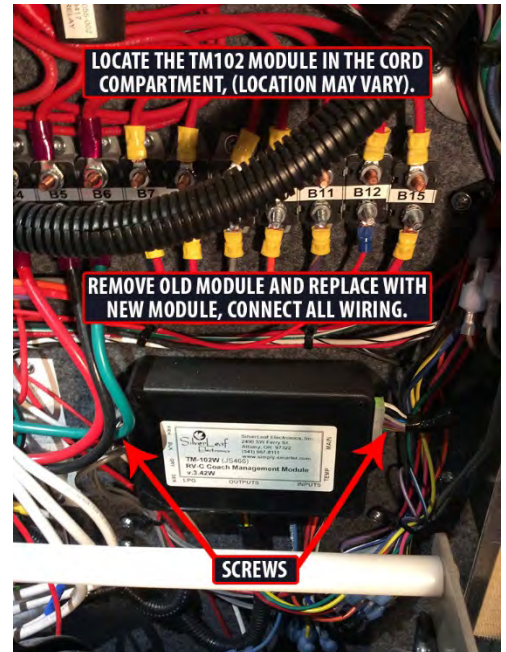

Issue:

During coach startup, the TM102 Coach Management module may crash the 500k data bus.

Correction:

Locate the TM102 module in the cord compartment. Remove and replace the old TM102 module with a new TM102 module (version 3.42) with the specific clone file for the coach. Unplug the old TM102. Remove the two mounting screws, and plug in the new module. Remount it with two screws.

Affected Units: See attached population list for specific units.

RECOMMENDED ACTION

Contact your Service Account Manager for authorization and to order the coach-specific TM102 module. The module will be set up and configured for the specific coach in which you are replacing the module. Return the old module to Newmar.

Flat rate: TSB 491

Labor Time: .5 hr

Please read this bulletin in its entirety prior to beginning any diagnosis or repairs.
