# Warranty Information

**General Communication**

**Number: VWC-17-07**

**Subject: Sales Preparation Program for New, Unused, Unsold Model Year 2014 Volkswagen 2.0L TDI Passat Vehicles in Dealer Stock with Less than 1,000 Miles**

**Date: July 24, 2017**

This document conveys Volkswagen Warranty general information.

New, unused, unsold Model Year 2014 Volkswagen 2.0L TDI Passat vehicles in dealer stock with less than 1,000 miles may require additional attention prior to retail sale.

To support dealers in preparing these vehicles for sale, and to help ensure a positive customer delivery experience, Volkswagen is offering a sales preparation program that allows dealers to prepare these vehicles before sale (within certain parameters).

Certain services will be mandated for all new, unsold Model Year 2014 VW 2.0L TDI Passat dealer stock vehicles with less than 1,000 miles in order to bring these vehicles in line with maintenance cycles and proper detailing. Some vehicles may require additional services in order to mitigate any extreme or environmental effects.

## Service Instructions

Note that the information in this communication can also be found in Technical Bulletin Instance Number 2048464 *Extended Inspection for New, Unused, Unsold Model Year 2014 Volkswagen 2.0L TDI Passat Vehicles in Dealer Stock with Less than 1,000 Miles*.

### Step 1:

Perform the work procedure found in the 23U4 Emissions Recall Circular. This step **must** be performed prior to any sales preparation activity. Ensure the IN-FORM tool is properly utilized for the approved emissions modification. The IN-FORM tool can be accessed here: <https://tdi-inform.track360.com/>. Not using the IN-FORM tool to properly document and validate the modification will stop the processing of payment for your dealership even if the modification has been completed.

It is critical to ensure that all components included in the **23U4 Emissions Recall Circular Appendix A – Requirements for Vehicles within New and Resale Vehicle Inventory** are applied to the vehicle. Please refer to the latest 23U4 Emissions Recall Circular for more information on the additional requirements.

---

## Step 2:

Review/perform the mandatory sales preparation services listed below. Note that repair authorization is not required for these items, however, documentation is required per the *Volkswagen Warranty Policies and Procedures Manual*.

- Test battery using Midtronics tester, charge or replace battery as necessary
- Road test vehicle for 10 miles
- Check and replace (if necessary) wiper blades
- Perform engine oil change with filter
- Replace cabin air filter
- Perform brake fluid flush
- Replace fuel filter
- Add diesel fuel (maximum \$12)
- Perform vehicle detail
- Ensure that *Inventory Vehicle Extended Inspection/Maintenance Form* (attached) is completed for all required inspection items. The form must be completed and signed for each vehicle, and must be retained as part of required documentation, along with a valid repair order

## Step 3:

Review/perform the services listed below based on the result of a road test. Note that repair authorization is required for these items before proceeding with sales preparation services. If brake components or tires are in need of replacement, create a Warranty Repair Acceptance Request in WISE > Operations using *VW-Owned TDI Request* for authorization. If authorized, perform repairs and retain replaced parts, if any, for QTM inspection.

**Note: Dealers should be prepared to provide documentation of 30-day inventory maintenance services, if requested.**

- Brakes  
If brake vibration/noise is present after road test, replace brake pads/rotors on affected axle(s). Retain replaced parts, if any, for QTM inspection
- Tires  
If tire vibration is present after road test, extend road test additional 10 miles (as noted on *Inventory Vehicle Extended Inspection/Maintenance Form*) and recheck for vibration. If still present, replace affected tire(s). Retain replaced parts, if any, for QTM inspection

## Step 4:

Perform other services needed for vehicle to be saleable as new. Note that if other services are needed, create a Warranty Repair Acceptance Request in WISE > Operations using *VW-Owned TDI Request* for authorization. If authorized, perform repairs and retain replaced parts, if any, for QTM inspection.

# Inventory Vehicle Extended Inspection/Maintenance Form

Stock Number:

Dealer Number:

R.O. Number:

VIN:

Mileage In:

Mileage Out:

## Technical Inspection – Pre-Road Test

- Transport mode deactivated
- Perform battery test with Midtronics test equipment. Charge or replace battery if indicated by test result
- Campaign 23U4 including Appendix A must be performed
- Check vehicle interior condition
- Visual inspection of vehicle body
- Check and adjust tire pressure to specification
- Check engine oil level
- Check fluid level (brakes and coolant)
- Check and adjust wheel bolt torque, if needed

## Road Test – 10 Mile Minimum

- During road test, add diesel fuel (up to \$12.00)
- Apply brakes several times to remove surface corrosion (in a safe and appropriate area)
- Observe proper driving characteristics of vehicle (noise, vibration, flat spots on tires)
- If, after 10 miles, abnormal driving characteristics are still present, extend road test for additional 10 miles

## Technical Inspection – Post-Road Test

- Visually inspect vehicle undercarriage (brake lines, exhaust, steering, bushings)
- Check for debris and clean plenum area, under hood, and sunroof drains
- Perform all outstanding campaigns/updates, if any
- Perform other items listed under STEP 2
  - Replace wiper blades, if necessary
  - Change engine oil and filter
  - Replace cabin air filter
  - Perform brake fluid flush
  - Replace fuel filter

I certify that all operations have been completed and that this vehicle has been prepared in accordance with Volkswagen procedures and quality standards. (Attach this checklist to the repair order)

- All product updates have been checked
