

PRODUCT UPDATE

Height Control Valve Kits

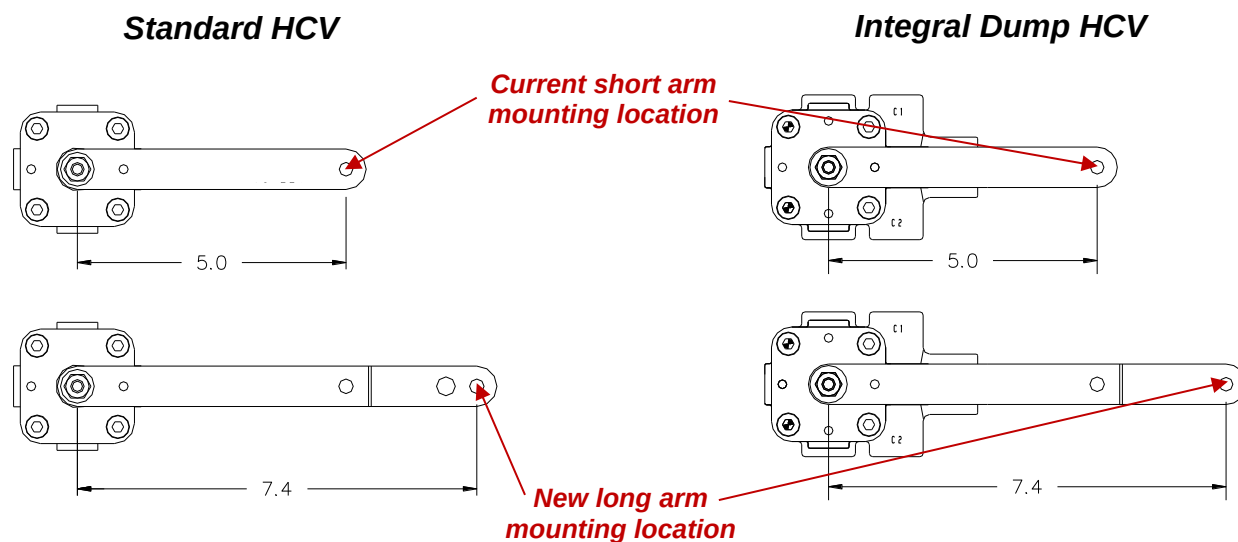

LIT NO: P56042

DATE: October 2017

Hendrickson Trailer Commercial Vehicle Systems announces a change to AKH0282 Height Control Valve Kits. These kits are for use with INTRAAX® AANT/AANL 23K suspensions and INTRAAX-SP AAZNT 23K/46K/69K platform slider suspensions featuring the 5.75" LDA™ Large Diameter Axle in conjunction with air disc brakes.

Effective mid-October 2017, the height control valve in the following kits will no longer have a short control arm. Instead, the valve will now have a long control arm. Please note, the link assembly should be attached to the hole closest to the end of the control arm (*shown below*). This change is designed to eliminate the possibility of the arm flipping when the suspensions are placed in full rebound, such as when a trailer is lifted completely off the ground. The function of the HCV does not change and therefore, HCV kit part numbers will not change.

Kit Part Numbers	
Standard HCV	Integral Dump HCV
AKH0282-3	AKHD0282-3
AKH0282F-3	AKHD0282F-3
AKH0282B-3	AKHD0282B-3

As always, Hendrickson is committed to providing world-class products and exceptional customer service. Please contact your Hendrickson sales representative or call 1-866-RIDEAIR (743-3247) to speak with customer service regarding the change.

Call Hendrickson at **330.489.0045** or **866.RIDEAIR (743.3247)** for additional information.
