

Power Sliding Doors *Won't* Latch When Closed?

AFFECTED VEHICLES

2018 Odyssey (EX and above)

We're currently looking at complaints that the power sliding doors won't latch when closed. When this happens, the **Door Open** message appears on the driver information interface, there's a constant beeping while driving, and the rear edge of the door sticks out.

If you get a vehicle in your shop for this issue, for now, replace the rear latch.
