Cause

These concerns could be caused by a poor connection in the camera signal circuits 6972 and/or 6973. (W/O UVH) The Std Rear Camera signal circuits 6972 and 6973 run between Rear Camera B87 (Rear Camera) to the HMI bypass module K188 to the HMI module K74 For 360 degree Camera system (RPO UVH) the Camera circuits 6972 and 6973 run between the rear camera B87 and the Video Processing Module K157 to the HMI Bypass Module K188 to the HMI Module K74.

Correction:

If, after performing normal SI diagnostics, the cause has not been found, inspect camera signal circuits 6972 and 6973 for opens, high resistance, poor terminal tension, bent terminals, etc. Replace and/or repair any damaged terminals, module(s) with bent pins, or wiring as necessary.

Warranty Information

For wiring repairs covered under warranty, please refer to latest version of bulletin [10-00-89-005](#) for warranty information on wire/connector repairs.

For module replacement for bent pins covered under warranty, use the appropriate labor operation code.
