Parts and Service Bulletin: Parts and Service Bulletin #63A

Subject: 2-Speed Product Improvements

Description: The 2-Speed improvement is a redesigned two speed gearbox used with our manual trap opening system. Failure analysis of field issues has shown that over time the roll pin that connects the gear set to the input shaft will loosen in the hole in the shaft and fall out. This pin has been replaced with a hardened shoulder bolt. The quality of the grease in the case has also been upgraded as well as a new gasket between the two case halves has been added, to minimize leakage.

Effective Date: December 1, 2017

ECN: #6150

New Parts: None

Service Parts: Part numbers remained the same

Reference drawing #: See illustrations (Page 2 of Bulletin)
