

Ferrari North America

Technical Information

Date: November 2017
Bulletin #: 2453
Campaign #:
Supersedes:
Section: 10

Model Type: See below
Model Year: All
Subject: 7 – Year Genuine Maintenance Schedule

Please note that as a result of testing and analysis conducted on the respective vehicles, Ferrari has decided to omit the following replacement operations from the procedures listed for the 75,000, 87,500 and 100,000 mile services of the 7-Year Genuine Maintenance Schedule. It has been determined that simply checking that these components are in proper working order is now sufficient.

These components must only be replaced, following existing procedures, if found to be defective or faulty.

Procedures indicated in 7-Year Genuine Maintenance Schedule which are no longer required:

- Replacing Oxygen Sensors;
- Replacing Catalytic Converters;
- Replacing Fuel Injectors.

Please notify the respective workshop personnel accordingly and inform customers bringing their vehicles to the workshop for services at the aforementioned mileage intervals that these procedures are no longer necessary.

The updated 7-Year Genuine Maintenance Schedules for the models concerned will be indicated in the technical documentation as of the **December 2017** update.

The above is applicable for the following vehicle models and versions:

Model	Version
Ferrari California	All model years
458 Italia	All model years
