17-17

Section

Chassis - 01

Description

Medium Duty Trucks with Wabco Electronic Stability Control (ESC) Smart trac and OnGuard Collision Mitigation System (CMS) will incorrectly show "ABS Make Bendix" within the navigation menu display.

Release Date

12/13/2017

Introduction

Informational Only

Peterbilt has been notified that certain Model 337 and 348 vehicles with trailer connections and WABCO ESC and OnGuard Active options built from 09/13/2017 until approximately 01/30/2019 will display "ABS Make Bendix". This information is located under 'ABS info' within the 'Truck information' section of the navigation display. This ABS supplier parameter must remain set to "ABS Make Bendix" in order for the Trailer ABS telltale to operate correctly. The display information will be corrected by a parameter update in the Namux 2 release scheduled for 01/30/2019.

There are no operational issues with the ABS, Stability Control or OnGuard Collision Mitigation Systems functionality as long as this parameter remains set to "ABS Make Bendix".

Resolution

INFORMATION ONLY

Notification will be published when the new release of Namux 2 corrects the parameter to display the correct ABS manufacturer. The update is targeted for January 2019 and will update the software to include "ABS Make WABCO" as a selectable ABS supplier parameter.

Warranty

Informational Only, warranty does not apply

Parts

No parts are required.

Procedure

Affected trucks may be re-flashed when the Namux 2 Release 10 software update becomes available.
