Description

Peterbilt 579 aero bumper radar cover license plate grommets require 1/4"x 20 x 3/4"long fasteners.

Release Date

12/13/2017

Introduction

Informational Only

Peterbilt 579 aero bumper radar covers require 1/4"x 20 x 3/4" long fasteners to properly secure state license plates to the bumper for maximum grommet retention. Any other fastener length may lead to the grommet not fully expanding for maximum retention, or could result in grommet failure – leading to state license plate loss during operation.

Resolution

INFORMATIONAL ONLY

Use only 1/4"x 20 x 3/4" long fasteners for state license plate installations on Peterbilt 579 aero bumpers.

Warranty

This is an informational bulletin

Parts

No parts are required.

Procedure

Install proper 1/4"x 20 x 3/4" long fasteners for all license plate installations on Peterbilt 579 models with aero bumpers. Longer fasteners may bottom out on the rear of the bumper structure. Shorter fasteners may not result in full expansion/retention of the insert.

See example below.

License Plate Retention Test

- License Plate Fastener Insert Accommodates a 1/4"x 20 x 3/4" Fastener
 - Allows full expansion and retention
- If customer installs their license plate with a fastener smaller than specified, then the insert does not fully expand for full retention (Pictured Above)
