Text

DESCRIPTION:

* Vehicle type updated for Type 256.

Too much play in the backrest on the front seat.

SERVICE:

The locking retainer/washer must not be tight against the seat frame. It must have a play of 1,0mm +/-0,5mm.

See repair instruction TJ 32508.

VEHICLE REPORT:

Yes, please submit a Vehicle Report if the service solution described in this TJ has no effect. Use concern area "Vehicle Report" and sub concern area "Support not needed", use function group 8522.

Removal

Note! Removal steps in this procedure may contain installation details.

Color symbols

Note! This colour chart displays (in colour print and electronic version) the importance of the different colours used in the images of the method steps.

- 1 . Used for focused component, the component with which you will do something.
- 2 . Used as extra colors when you need to show or differentiate additional parts.
- 3 . Used for attachments that are to be removed/installed. May be screws, clips, connectors, etc.
- 4 . Used when the component is not fully removed from the vehicle but only hung to the side.
- 5 . Used for standard tools and special tools.
- 6 . Used as background color for vehicle components.

Orientation view

Remove the screws.

Note! The graphic shows the back of the component before removal.

Remove the marked part.

Remove the panel.

Remove the screws.

Remove the marked part.

Disconnect the connector.

Vehicles without power seats

Remove the marked part.

All vehicles

Remove the screws.

Remove the marked part.

Remove the fastener.

Note! This step requires the aid of another technician.

Use: Pliers to hold the rod while installing the locking retainer.

Use: Retainer , 31446429
Install the marked component.

Adjustment

Note! Hit the panel surface lightly several times rather than hitting it hard once.

Adjust to the specified value.

Use: Feeler gauge

Installation

To install, reverse the removal procedure.
