Bosch Class Action Communications

Dear Sir/Madam,

On February 14, 2017, the Court preliminarily approved a proposed class action settlement between Bosch and class plaintiffs related to the TDI diesel emissions matter. Today, Bosch will begin the process of sending official notice and communicating the details of their settlement to current and former owners/lessees of affected 2.0L and 3.0L TDI vehicles. Although these communications will direct consumers to the Bosch Settlement website, you may also receive questions.

The Bosch settlement is separate and apart from, and in addition to, the VW settlements. As such, we recommend that you refer and all questions you may receive regarding the Bosch settlement directly to www.BoschVWSettlement.com or to Bosch's settlement hotline at 1 (844) 305-1928.

We will keep you updated as new information becomes available. Thank you for your continued patience and cooperation.

Kind Regards,

Audi Operations
