SUBJECT: **Injector Heat Sleeve Removal Tool DSN930E17002**

GENERAL INFORMATION

The Detroit™ special tools group has developed a new injector heat sleeve removal tool for medium duty DD5 and DD8 engines. The tool is needed for cylinder #6 on DD8 engines in low cab height applications where clearance is limited. This new tool will work for all DD5 and DD8 injector heat sleeves.

COMPONENTS SUPPLIED WITH THE TOOL

Injector Heat Sleeve Removal Tool

TOOL USAGE INSTRUCTIONS

1. With the injector harness and injector removed, insert the injector heat sleeve removal tool.
2. Push down on the top of the tool to lock the tool into the heat sleeve and pull up to remove.

ORDERING INFORMATION

This tool will be automatically shipped and invoiced to your facility. Locations that are **NOT** DD Medium Duty Engine-certified in SSI will need to order the tools through the Paragon system. Tools can be ordered through Paragon using a DDE supplier prefix.

CONTACT INFORMATION
