From	National Field Recall					
Subject	DMV Registration Report					

To enhance dealer outreach efforts, DMV Registration data specific to the Takata airbag inflator recalls will now be provided to dealers in a more robust and searchable Excel format, which cannot currently be supplied through the iN. Effective Monday October 16, 2017, dealers who previously signed the release consent form may request these enhanced reports directly from their respective Zone Parts & Service Recall Teams.

To avoid confusion, on Sunday October 15th, the DMV Registration Report, which has been available to dealers since December 2016, was removed from the iN.

Though DMV information will be provided by Honda Zone offices, it is important to note your Dealer Participation Agreement still applies:

- Recall Data shall be used by authorized dealer personnel solely for the completion of the Takata Airbag Inflator recalls and for no other purpose whatsoever.
- Recall Data shall not be used for marketing or other consumer solicitations.

For any questions, please contact your Zone Parts & Service Team

Thank You
