

# **Initial Calibration of Compass During PDS**

Service Category	General		
Section	Pre-Delivery Service	Market USA	Lexus Supports ASE Certification

#### Applicability

YEAR(S)	EAR(S) MODEL(S) ADDITIONAL INFORMATION	
2018	ES300H, ES350	

#### Introduction

2018 model year ES 300h and ES 350 vehicles are equipped with a compass in the rear view mirror. Use the following procedure to complete initial calibration of the compass during Pre-Delivery Service (PDS).

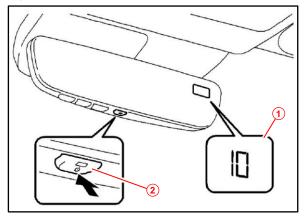

#### Warranty Information

OP CODE	DESCRIPTION	TIME	OFP	T1	T2
N/A	Not Applicable to Warranty	-	-	-	-

#### **Compass Calibration Procedure**

 Cycle the ignition switch to the "IG-ON" position and push and hold the mirror switch until the zone number appears on the compass display.

#### Figure 1.

1	Compass Display	
2	Mirror Switch	

## **Initial Calibration of Compass During PDS**

#### **Compass Calibration Procedure (Continued)**

2. Push the mirror switch to select the number of the zone where the vehicle is located.

#### NOTE

When the compass is NOT in calibration mode, pushing the mirror switch will toggle the compass display ON and OFF.

See the map for zone reference.

#### Figure 2.

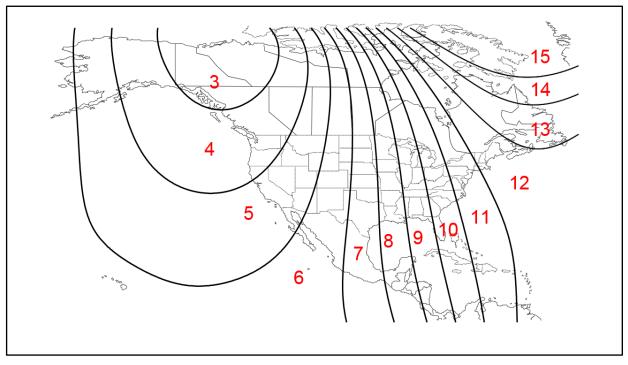

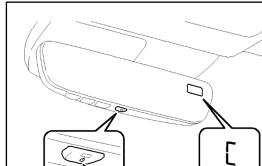

Figure 3.

 Start the engine (or hybrid system) and push and hold the mirror switch for about 12 seconds until "C" appears on the compass display.

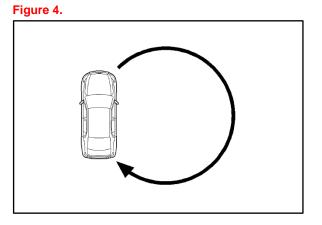

# د L-SB-0131-17

## **Initial Calibration of Compass During PDS**

#### **Compass Calibration Procedure (Continued)**

 Drive the vehicle slowly at 5 mph (8 km/h), or less, in a circle until the direction is displayed. If there is NOT enough space to drive in a circle, drive around the block until the direction is displayed.

Once the direction is displayed, the calibration is complete.

#### NOTE

- Do NOT perform calibration of the compass in a place where the Earth's magnetic field is subject to interference by artificial magnetic fields (underground parking, under a steel tower, between buildings, roof parking, near a railroad crossing, near a large vehicle, etc.).
- During calibration, do NOT operate electric systems (moon roof, power windows, etc.) as they may interfere with the calibration.
