Vehicle Identification Number (Sticker)

## D/C CUT FUSE INSTALLATION

To minimize battery discharge the D/C Cut Fuse has been removed and is stored in the engine compartment Relay Block. Install the D/C Cut Fuse and confirm ALL related DTCs are cleared.

### DTC Clearing Procedure

1. Connect Techstream.
2. Cycle the ignition switch to the "IG-ON" position.
3. Using Techstream, check ANY other codes being output.
4. Erase DTCs (B1650 and B1794) and Freeze Frame Data.

#### NOTE

If ANY DTCs besides B1650 and B1794 appear, repair the applicable system according to the Repair Manual.

- 1 Relay Block
- 2 Install D/C Cut Fuse (30A) Here (Original Location)
- 3 Remove D/C Cut Fuse (30A)

## TIRE PRESSURE WARNING SYSTEM (TPWS) INITIALIZATION

Refer to the Repair Manual for the [Initialization procedure](#). Please note the spare tire does NOT have a TPWS sensor.

#### NOTE

To adjust the tire pressure correctly when the outside temperature is significantly colder than shop temperature, perform a Health Check using Techstream and select the "Compensation Tire Pressure" checkbox. Compensation pressures will be displayed on the Health Check results screen. Adjust the tire pressure when the tires are cold.

## FRONT LICENSE PLATE AND MOUNTING BRACKET INSTALLATION\*

For states that require a front license plate, install per this procedure. The bracket and self-tapping screws are stored in the luggage compartment.

### Installation Procedure

1. Align the holes on the front license plate mounting bracket with the dimples on the front of the lower grille.

#### NOTE

- Holes "A" are used for the installation of the mounting bracket to the front bumper cover.
- Holes "B" are used for the installation of the front license plate to the mounting bracket.

2. Align holes "A" of the mounting bracket with the dimples on the front bumper cover. Mark the locations of holes "B" on the front bumper cover.

#### NOTICE

Do NOT drill into the dimples of the front bumper cover.

3. Drill two relief holes with a diameter of 11 mm (0.43 in.) at holes "B" on the front bumper cover. This will prevent the license plate retaining bolt ends from contacting the bumper cover.
4. Install the mounting bracket to the front bumper cover using the two self-tapping screws provided.
5. Install the front license plate to the mounting bracket using two non-corroding bolts with the following dimensions:

**Nominal Length: 15 mm (0.59 in)**  
**Diameter: 6 mm (0.24 in)**

- 1 Mark and Drill Holes
- 2 Dimples
- 3 Mounting Bracket

- 1 Self-tapping Screws
- 2 License Plate
- 3 Bolts
