Service Information

Offboard Diagnostic Information System Service (ODIS Service)

Number: VOS-17-31

Subject: Software Version Update, Enhancements and Fixes

Date: Nov. 29, 2017

Supersedes VOS-17-29 due to a new Diagnostic content version

The following ODIS Service software versions are available for download.

Current ODIS Service Software Versions	
Application: V4.2.3	Diagnostic Content: V2.35.1

Key Fixes/Enhancements for Diagnostic Content: **2.35.1**

- **16 - Jetta 2011 >, 16 - Jetta 2011 > USA/Canada only AND 5C - Beetle 2012 >, 5C - Beetle 2012 > USA/Canada only**
Cooling capacity test updated
Evaluation will now be done automatically; manually entering the values is no longer required
- **16 - Jetta 2011 >, 16 - Jetta 2011 > USA/Canada only**
0075- Telematics (Car-Net OCU) missing from Select Self-Test > Electrical systems and Guided Functions is restored.
- **BW - Tiguan 2018 USA/CAN > only**
The calibration of the Blind Spot Detection Control Module (rear radar entry) is performed dynamically (automatically). Static calibration should be done only if instructed. Test is linked with the DTC C118FF0 when required.
- Translation issues fixed for all vehicle types.

To identify the versions currently installed on a diagnostic device, please refer to *ODIS Service – Service Information* document title: *Online Update Guide – Section 4.0*
