Beanstandung.jpg	Steering wheel with wear

Cause:

Heavy soiling, e.g. dust, grease, sweat etc.

Remedy:

Always remove all dust and loose dirt using a brush or vacuum cleaner.

Clean with a damp cloth, then leave to dry and loosen the surface with a soft brush.

If the soiling is severe, water may be used with a neutral detergent.

Note: This work cannot be invoiced through W&G channels.
