Maintenance work deletion: Changing the chain set during maintenance

Details

Changing of the drive chain set is presently prescribed at 12,000 mi. in the maintenance schedule for BMW Service for the K02 and K03 models. Due to positive experiences from the endurance trials, a change at this stage may not be required. Thus the maintenance work "Changing the chain set" will be replaced by the maintenance work "Checking and lubricating the chain drive" as in the case of other models with chain drive.

Vehicles affected

The change to the maintenance work is effective for all K02/K03 vehicles retrospectively from series introduction.

Service Solution

The maintenance work in BMW Service will be replaced in AIR in the 12/2017 version. The maintenance matrix in the rider's manual will be adapted in the next edition (will be published on 01/2018). In the case of queries, customers are to be informed of the changed facts. Replacing the rider's manual is not required.
