Battery: Determining the recharging date

Details

From August 2017, batteries delivered to BMW Motorrad are fitted with a data matrix code by the manufacturer.

The recharging label is (partially) omitted.

The last complete charging date is recorded (calendar day and year) in the data matrix code and also below that in plain text.

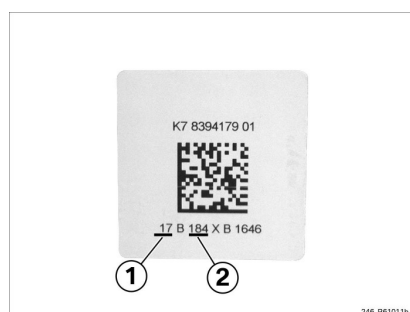

Figure: Data matrix code with the last charging date

- Year (1)
- Calendar day (2)

The battery must be recharged after 4 months max.

For batteries, which are installed and connected in the vehicle, the time period is reduced to 4 weeks.

Vehicles affected

New vehicles and replacement batteries

Important notes on battery maintenance and warranty processing

If a battery exchange should be required on warranty, note the following Service Information:

- SI 61 003 10 (039)R Fully charging batteries: New and showroom motorcycles

Warranty processing

Information Only
