The image in SMTP is incorrect and was supposed to be pulled.

You my friend are all good. Rest easy and have a great weekend! :-)

Nothing I'd totally trust if I were you. I found some places online that showed what looked like techdoc data that 5K0 498 621A Superceeded to 1K0 498 621, and I found that number as a current number in Parts link which has is pretty good for OE data and then found the 8V0 498 625 B in the parts link data as the current number for the late model audi's. When I googled around online for a picture of someone that was selling a genuine Audi/VW part I could at least see that it was the 3 bolt but obviously I can't visualize anything more than that. So as I decided I had it figured out, I was left with now just trying to figure out where to look all this up by application since worldpac was confusing and I thought maybe it's the SKF BR930823 but their listing doesn't even show the A3. Then I remembered that you have cataloging on Showmetheparts so I went to see what you said it fits. Then I looked and found the picture below which you show for the 57BWKH04. I have some 57BWKH04's and they don't look like that. Please tell me that's an error so I can continue to go on thinking I've got this figured out.

Thanks

Adam,

Thanks for your diligence.

Can I ask how you validated that the NSK data was correct?

I may also want to use that source for validation if I'm not.

Thanks again and have a great weekend !

Brenda,

I take it back I've now been back and forth a bunch with all you info and I think the answer is that you guys are absolutely correct with all of it. My only issue was that worldpac has it wrong and sells the KH30002 where they should have the KH30001 but now that I'm all squared away you don't need to waste your time helping them if you haven't already. I need them to be wrong once in a while to compete. ? That sounds evil.

NSK00002

Thanks

Hi Adam,

Thanks for quickly getting back to me.

You're all set.

I'll get back to you as quick as possible on the items we talked about.

HUB Prokits - Incorrect Interchange - KH30001 vs KH30002
HUB Prokits vs HUB only - Compare KIT APP. to HUB only APPS to see where bearing only is needed.

Was there anything else i missed?

Thanks again for your feedback Adam.

Brenda,
We had 11 of those Nissan hubs and all were correct.
Thanks

Subject: RE: NSK New Numbers - New Distributor Price List Correction

Hi Adam,

Did we get this cleared for you?
The KH kit offers are for the same applications.
The difference is that the kit includes the mounting hardware replacement parts.

Please let me know if you need additional information.

Thank you

NSK00003

Brenda,
If the KH30001 fits all three crosses that the 57BWKH04 was supposed to fit than what does the 57BWKH04 really fit. My best guess is that the 8V0498625 is really the 57BWKH04 and not the KH30001 but I'll wait to hear from you on that.
I have the same question for the 60BWKH07, which previously had all the crosses of the KH30002 please tell me the OEM crosses to that number as well.

Subject: NSK New Numbers - New Distributor Price List Correction

Hello Adam,

Your new distributor price list has 2 NSK part to OE corrections.

KH30001
KH30002

see attached revisions on the March new number announcement and let me know if you have any questions or would like to place an order.
