

No.: 17 TS-3

February 8, 2017

TO: All Service Locations

FROM: Service Systems Development

SUBJECT: **Advanced Diagnostics "New for DL 8.05 SP1"**

SUBJECT DETAIL

In preparation for the new OWL system release, all of the SRT codes provided in Advanced Diagnostics have been converted to the new OWL system coding. All Advanced Diagnostics accrue, and include the diagnostic time in the repair report. Additionally, they include SRT codes for the primary failed part and any components that require Removal and Installation (R & I) during troubleshooting. Users should be using this updated information for their repair orders and warranty claim processing.

There are 192 advanced diagnostic procedures in DL 8.05 SP1 (released 1/06/17), which include 43 updated and 8 new ADs along with four bug fixes. For the updated list, please refer to [DDCSN/Tools/Electronics/Advanced Diagnostics/Released Advanced Diagnostic Procedures](#).
